

GERMAN SHORTHAIRED POINTER CLUB OF VICTORIA INC.

CHAMPIONSHIP SHOW

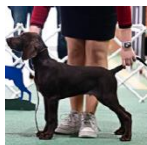

Saturday 22nd April 2023

JUDGE: Mr. Jeff Martin (Canada)

CRITIQUE'S

BABY PUPPY DOG

#1 – OAKRIDGE DJANGO

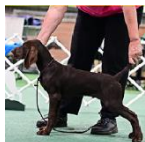

Good topline, front, rear angulation and tail set. It and its litter mates all have great feet, good bone, nice heads, length of muzzle, skull and ear set all very good. This puppy has the best chest and sternum, the fore chest is wonderful. Should be a very nice puppy.

#2 – CANAWINDRA CATCH TWENTY TWO

A very together puppy and moves very nicely, he is a bit long in body at this stage and low in tailset. He shows well and moves very correctly.

#3 – OAKRIDGE DANTE

Very good forechest, where he lacks is depth of chest, the rear ribs are rather short and not quite as good in the topline.

#4 – OAKRIDGE DREAMER

Good type overall, good front end angulation, where this dog could be better is the pigment could be darker and its tail take off is a little bit low, other than that he is a very nice puppy.

MINOR PUPPY DOG

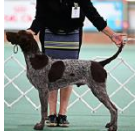

#5 – OAKRIDGE CRUSADER (AI)

Fairly tall and leggy at this stage, good forechest, good angulation back and front, good topline, good length of neck, good depth of chest and nice head. A little bit low on tailset but overall he is a very nice dog, SG or VG dog at this stage.

PUPPY DOG

#7 – KOBIDAN WHOLEHEARTED

Tall 12 month old male, very correct, very good mover straight out and straight back, good shoulders not crossing, not tight, great forechest, great topline, beautiful depth of chest, very masculine dog, nice style of dog quite a heavy bone dog will be interested in seeing how he is as a 2 -3 year old.

#6 – SEWDA MY LOVE FOR LIFE

Nicely put together more finer elegant dog, he is high in rear because he is rather steep in the croup and therefore has a low tailset resulting in being straighter in the rear end and consequently lacks drive in the rear when moving.

JUNIOR DOG

#8 – CANAWINDRA HIGH FLYER

Sound dog overall, SG type dog, moves very true. On the move his tailset is very good, it comes off fairly high off the back, his topline is good. His arm doesn't angle back under his body so therefore lacks a bit of forechest and front angulation, his skull is fairly long compared to the length of his muzzle. He is quite broad in skull which affects his eye set, body is pretty good, good bone, good feet but head could be improved.

INTERMEDIATE DOG

#10 – CANAWINDRA AHEAD OF YOUR TIME

Fairly tall dog but well within standard, he doesn't have the substance/depth of chest that you would expect in a 2 year old male. He is a little straight in front lacking depth of chest, very good tailset. The head is ok and eye colour is ok, lacking a little bit of flue in front, shoulders are a bit broad, little bit lacking in angulation therefore affects the forechest and the heads broad in the skull. Not unlike the previous dog. Other than that a very good dog.

AUSTRALIAN BRED DOG

#11 – HEIDERST GOOSEBUMPS (AI)

Fairly sound dog, heavy bone, heavy head, deep muzzle, moves close behind. He has a fairly steep croup and not high enough tailset. A little on the heavy side for me today. Other than that he is a very good dog.

#12 – GR CH LIVERPOINT CRACKERJACK (AI)

Good lay of shoulders, plenty of fore chest, topline excellent, angulation back and front excellent, good male head, tad short in muzzle, pigment could be darker but its not light, great depth of chest, his height to length is great, when just free standing-his tailset is excellent, when he moves he is quite proud it's a little high but not too bad.

This is an excellent dog.

#13 – CANAWINDRA SKY LINE

He is a fairly good overall, his depth of chest, bone, size for a 2 year old male. He is quite masculine, he is strong in muzzle and it is a tad short which makes his muzzle look a little square, topline is great, rear angulation, movement is all correct for a 2 year old male. He is a little bit soft in temperament, presents well, but, he is a little tentative with anything new.

#14 – CH CANAWINDRA EAST COAST LEGEND RN

He has got good depth of chest, beautiful topline, he is a very good dog what we would call an SG dog. Depth of chest is good he looks every bit of a 4 year old dog, very calm, confident temperament. Moves nicely and has good pigment. Where he could be better is he is a little short in length of muzzle and heavy in depth of muzzle. Overall a very good dog.

OPEN DOG

#15 – CH CANAWINDRA ROLL THE DICE

Nicely constructed male, good substance, good eye colour, correct construction back and front could do with a little more forechest but not too bad, good tail set. Temperament is a little on the soft side needs a little more confidence.

#16 – CH OAKRIDGE WALDEMAR NRA QC

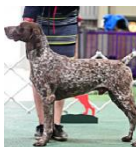

Beautifully put together male, lovely long strong muzzle, beautiful strong head, a little narrow in the eyes but lovely depth of chest, topline a tad longer in body than in height which is what you want, tailset is perfect, he moves beautifully, he is a really, really nice dog. He has got that bullet proof temperament. Other than being slightly over standard height but other than that he is a very, very nice mature male.

#18 – AUST CH KOBIDAN RITE OF PASSAGE

Sound dog, temperament not strong, muzzle is short and very deep, he is quite a heavy headed dog, not great in movement a little close in back and front.

#19 – CH KOBIDAN PRETTY BOY FLOYD

Very sound dog he has good angulation and front forechest, topline is a tad long but not too bad he is confident and moves really nice back and front coming and going, really true nice and straight with very little crossing over. He is a very true moving dog, heads good, pigments good, temperament is perfectly fine. Where he could be better is he is a little perhaps sun bleached but as a breed standard he is a little on the light side of pigment overall. Very sound dog.

VETERAN DOG 7 – 10 YEARS

#20 – CH TRUPOINT CRITICAL ACCLAIM (AI)

9 year old male, good size overall, side on moves correctly, reasonable confident, very broad in shoulders, the width of the shoulders from front on and very short in croup, his tail takeoff is really high on the back, so he is broad in the front and short in the tailset. A sound/useful dog but not a beautiful dog.

DOG CHALLENGE & BEST IN SHOW: #12 GR CH LIVERPOINT CRACKERJACK (AI)

RESERVE DOG CHALLENGE: #16 CH OAKRIDGE WALDEMAR NRA QC

BABY PUPPY BITCH

#21 – OAKRIDGE DESTINY

Beautiful head, length of muzzle, ear set, arching neck, great forechest, great topline, good angulation back and front, good tail take off. Going to be a really, really nice puppy.

MINOR PUPPY BITCH

#22 – OAKRIDGE CALYPSO (AI)

This dog is quite leggy, she is very correct when she moves, however, really close behind, but, she is really young and that can change, she lacks substance but I can see the correctness of the dog. Its hard to say where she will end up. I can see the forechest and angulation but she is just a leggy dog at the moment. Would like to see her in a couple of years.

#23 – POINTSURE REBEL GRAFFITI

Very good dark pigment, confident dog correctly, plenty of forechest, moves correctly, little bit paddling in the front but very young, good size think she will be a nice dog when finished, she shows surprising amount of substance, great length of reach and drive for a 6 month old puppy. She moves really correctly. Very nice pup.

PUPPY BITCH

#24 – OAKRIDGE AFRICA

Very nice female, little long in coupling, little long in body, this may change as she is only 9.5 months old, beautiful head and neck, lovely temperament, good angulation, she moves well, beautiful dark eyes. Very nice dog.

JUNIOR BITCH

#25 – SMACKPOINT OTHERWORLDY STORY

Very nicely put together female moves a little close behind, good tailset but over all a nice style female for 12 months old. Good topline, little straight in front. Head is a tad short overall, short skull, short muzzle, little short in neck, nice tail carriage. Very good looking dog.

#26 – HEIDERST PRETTY LITTLE LIAR (AI)

Overall nice substance, good depth of chest, good bone. She is a little flat in temperament, has a low tail carriage that causes her to be very close in rear when she is moving. The front is good, overall a sound dog. Strong head, however, the eye lids are a little loose. Overall a nice dog.

#27 – CANAWINDRA HIGH TEA

12 month old female on the smaller end of the standard, little straight in front, little broad in shoulders, she is a little bit short in coupling, therefore, when she moves it makes her a little close. She has a prominent skull but her muzzle is short and fine so her head is not correct. Nice dog.

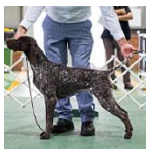

INTERMEDIATE BITCH

#28 – POINTSURE POP STAR

Sound dog, she is a little straight in front, lacks a bit of forechest, good depth of chest, good tail carriage, she moves quite good particularly side gate, she has great dark eyes but her muzzle is too short and too fine, her skull is fine for a female but the muzzle is short and narrow which detracts from the dog but overall a sound dog.

#29 – TRUPOINT ACCOLADE

Good depth of chest, good forechest, good angulation, overall a very nice dog. She is a little high in rear but moves correctly side, coming and going, carries her tail well. Solid temperament. Overall a very nice female with good substance and good pigment.

AUSTRALIAN BRED BITCH

#30 – CH OAKRIDGE WINDSONG

Really nice female, beautiful head, good length of muzzle, skull, ear placement, eye set, just a lovely female. Leggy and athletic, good forechest, adequate angulation in the front, good topline, good angulation in the back, good tail carriage and beautiful arching neck. Very high quality female.

#31 – CANAWINDRA ON A ROLL

Not overly dark in pigment, good depth of chest, height, length and size. overall good substance, she moves quite good, low in tail set, head is a little broad in skull and a little short in muzzle relative to the length of skull this is exaggerated by the low ears, confident temperament, sound dog.

#32 – CANAWINDRA ROLL ON BY

Strongly build female, head is strong, low in tailset, a bit wide in the rear when she is moving as she isn't driving, she doesn't have that bold, confident temperament. Sound dog.

#33 – CH KOBIDAN RUMOUR HAS IT

Sound overall, moves quite well, a tad long in body, a little bit longer in coupling, but, good substance, good bone, good size,

#34 – CH POINTSURE BUSTA MOVE (AI)

Nice female overall, she is a very good dog with a good head, she paddles a little bit in the front and stepping high, the position of the hips is causing the slightly low tailset, a tad over angulated and the looseness in the rear end rather than driving from the rear is causing steepness of the croup. Overall a nice female with a good solid temperament.

#35 – TRUPOINT WHEN WISHES COME TRU

Sensational pigment for a solid brown dog she has some of the darkest eyes you will ever see. Superb frontend, good head, beautiful angulation, great forechest, beautiful deep chest, lovely lay of shoulder, she is a correct mover back and front, good size female not too big not too small, medium size. Temperament is solid, she has got plenty of spark about her where she could be improved is she is just a little low in tail set when standing but not bad she carries it well on the move. Really excellent dog.

Bitch Challenge -

Liver female beautiful dog beautiful arching neck superb pigment could be better in the rear end but just the depth of chest and the beautiful lay of shoulder the beautiful pigment very hard not to put this dog up. Very nice dog.

OPEN BITCH

#36 – CH CANAWINDRA OVER THE MOON

Good size female, she moves nicely coming and going, she lacks a little bit in forechest, but the heads nice, the necks nice she is a tad low in tailset but overall she is a really good dog by German standards she is nudging on an excellent but depending on the judge she could be an SG or an Excellent V but very nice dog overall.

#37 – ULANA ADIN DOM (IMP SVN) D1 S1 NRD NRA

Good size tallish female moves nicely, good pigment, lovely upbeat temperament, very strong and confident. Great forechest, great lay of shoulder, great length of upper arm, arching neck, length of head she is really nice. She is on the tall end of the standard for a female but very nice dog a hard dog to fault, when standing she is a little long in the croup, but she certainly doesn't show it when she is moving. Very nice dog.

#38 – AUST CH LIVERPOINT CALL ME MISS HARRY (AI)

Nicely put together, she is really good mover, medium size female, good pigment, good forechest, good lay of shoulder, correct angulation back and front, depth of chest, sloping topline very nice the only thing you could possibly ever fault her for is the head and skull is a bit small and short, short in muzzle and short in skull overall. One thing that is pretty unforgivable is she is a little bit timid and mild, the tail is under her, she will move ok and it could be hidden with baiting and squeaky toys etc but everytime I go near her she is trying to avoid me so a bit soft in temperament other than that a nice looking female.

#39 – CH CANAWINDRA UP BEAT

Very nice female, good depth of chest, good lay of shoulder, good angulation, plenty of forechest, beautiful arching neck and head carriage, dark eyes. Her temperament is confident and clam, the topline is great, she moves good and is a very nice female and in a lot of countries she would be an excellent v rated female.

#40 – CH KOBIDAN VANITY FAIR

Good size female, good substance, a tad long in body relative to her height but that's ok it is expected to be a little longer in body but she is just a tad longer than what she should be. Lovely temperament, calm, easy to live with, beautiful forechest, beautiful lay of shoulder, beautiful arching neck, lovely female. Her head, length of muzzle and skull are excellent, topline, rear angulation, tail carriage and movement are all good. An Excellent female.

VETERAN BITCH 7 – 10 YEARS

#42 – GR CH CANAWINDRA STORM IN A TEACUP

Strong in the head, plenty of muzzle, very square head, overall a very nice dog. She has a lovely front end and front end angulation, she is not a spring chicken at 7.5yrs but she is very sound, very correctly put together, she is a little heavy in the head, a little square, the length of the muzzle to the depth of the muzzle but eyes, ears and pigment are very nice. She is a very good mover. Very nice dog.

VETERAN BITCH 10+ YEARS

#43 – HEIDERST LIVING YOUR DREAM

14 years old amazingly, she has a grey muzzle she looks the part moves beautifully for an old dog, a little bit rickety which you would expect, good feminine head, good size, lovely neck, a little bit straight in front could be a bit deeper in the chest, good tailset but at this age the only thing can find fault is in the dog's movement. Very nice dog.

#44 – CH POINTSURE JUMP FOR JOY

An oldish dog she moves very correctly, pigment is good, the eyes are good very feminine head, length of muzzle, eye set etc is all good. As an older dog she wouldn't be as good as she was as a 5 year old a little bit steep in the croup and a little bit wide in the front but not too much, but overall a very sound dog Overall a very nice old dog.

BITCH CHALLENGE & RUNNER UP TO BEST IN SHOW: #35 TRUPOINT WHEN WISHES COME TRU

RESERVE BITCH CHALLENGE: #37 ULANA ADIN DOM (IMP SVN) D1 S1 NRD NRA

NEUTER DOG

#45 – CANAWINDRA SKY HIGH

Good size he'd be at the top end of standard 2 year old male, strong male head, good arching neck, he is actually overall a nice looking dog, good strong head plenty of chest, shoulder placement is great, topline, good angulation back and front, moves very correctly. Very nice dog.

NEUTER BITCH

#46 – AUST CH NEUTER CH LIVERPOINT BROWN EYED GIRL

Older liver female really good female tall leggy elegant very feminine good topline

#47 – CH POINTSURE REBEL WITOUTA SCOTCH

Good angulation and all that but carrying a bit of weight doesn't have the athleticism of the first dog.
